Munich Cyber Security Internship Program
## A partnership between Bavaria and USA

Looking for an intern in Cyber Security?
Join the Trans-Atlantic Internship Program on Cyber Security

- Transatlantic friendship and collaboration play a central role in the successful fight against cyber threats and the realization of global digital business models.

- The Champlain - Munich Cyber Security Internship program offers highly specialized US students internship opportunities at Bavarian high-tech companies.

- The program presumes to establish a long-term cooperation between the Security Network Munich and Champlain College, Burlington / Vermont, on Cyber Security and digital forensics.

Relations between the US and Germany are a cornerstone of geopolitical security policies. New serious challenges with major risks to the security of states, enterprises and people, require new forms of cooperation.

This was the motivation for setting up a Cyber Security cooperation "Bavaria - USA" between Champlain College in Vermont and Security Network Munich by the initiative of Markus Geier, CEO of ComCode. The internship program focuses on Cyber Security and Digital Forensics.

American Students majoring in "Cyber Security" and "Digital Forensics" are given the opportunity to pursue an internship with Bavarian companies. The companies benefit from the comprehensive **Cyber Security & Digital Forensics skills** of the students, while for them work experience in companies abroad is of great value. For the time being, the internship program will be managed by **ComCode** in cooperation with Champlain College while the Security Network Munich provides access to local companies in the wider Munich area.

Interested companies can contact ComCode directly by e-mail at office@comcode.de or call +49 8142 440 2180. The first period starts in May 2017.

CHAMPLAIN COLLEGE

For the second year in a row, Champlain was named the "Most Innovative School" in the North by U.S. News & World Report's "America's Best Colleges" 2017 regional rankings and listed among The Princeton Review's "The Best 381 Colleges" in 2017. Champlain College's award-winning Cyber Security and Computer & Digital Forensics programs provide the most complete, relevant education available.
